

Learn how J & K Heating and Air is keeping your family and our technicians safe during COVID 19

Here at J & K Heating and Air, Ventilating Inc., we are committed to the safety of both your family and our technicians. Our team has completed thorough training and is prepped and ready to ensure that your heating and air conditioning needs are taken care of.

Here are some of the things you may want to take advantage of, so we can all be more efficient during the process.

- We can do an in-home consult or a video consultation using Facetime, Google Hangout or Zoom

Here are some of the things you can expect from our technicians when they show up at your home.

- Upon arriving, we can greet you any way you choose - foot bump, elbow bump, wave, wink, courtesy, salute, etc. :-)
- Plastic gloves that will be worn throughout our visit
- Carry hand sanitizer on their belt
- Wearing booties on their shoes
- Wipe down all areas we contact with the disinfectant
- Limit exposure to 6 - 8 feet
- Temperature testing each the morning
- Our team is working on securing masks, just let us know if you want us to wear one
- Our team takes their Temperature at the start of every workday
- And of course, we will provide excellent indoor air quality, heating, and air conditioning solutions

Let's make your home a comfort zone. Let us help you create your perfect indoor environment. Give us a call today to discuss how we can make your and your family's life better.

Please ask our technicians about our Indoor Air Quality packages, special promotions, and no interest no payment financing options. As we are an HVAC company, we know there are many benefits to upgrading your air conditioning and heating equipment. Not only can replacing an aging heating and cooling system (including furnaces, air conditioners, and ductless splits) help you save money each month, but it can also help your mental health and well-being. Older units tend to not reach and hold the desired temperature. Not only can this negatively add to existing health problems (stiff joints, allergies, colds, flu) but can also make you cold and miserable or hot and grumpy. Plus, you may end up paying for multiple repairs when you could replace your equipment, upgrade your air and reap the benefits of a brand-new system.

Along with updated heating and cooling equipment, humidifiers and dehumidifiers are also beneficial when it comes to comfort as well as clean air.

Let's make your home the perfect place for your "staycation". Live, laugh and be comfortable!
